See clearly with Blue Print – renewed range of premium wiper blades

The Aftermarket specialist Blue Print has introduced a renewed range of premium wiper blades for European, Asian and American vehicle applications. This comprehensive programme consists of Conventional, Hybrid and Flat style blades plus specific-fit Rear wipers, covering more than 90% of Europe's passenger cars across just 47 part numbers.

All Blue Print wiper blades are designed and manufactured in accordance to Japanese Industrial Standards for quality, durability, chemical and ozone resistance, and are a direct replacement for the original equipment equivalent. The wiper blades from Blue Print are tested for 500,000 cycles for superior wiping performance, and are suitable for all seasons of weather.

Identifying the correct wiper blade for a vehicle has been simplified as a result of the Blue Print part number structure. The part number combines the wiper style and blade dimension making it easy to find the wiper blade you need. The full range and complete information can be found in our online catalogue partsfinder.bilsteingroup.com.

Background:

Ferdinand Bilstein combines the well-known product brands febi, SWAG and Blue Print under the bilstein group umbrella. Together, the bilstein group offers more than 60,000 different technical spare parts for professional vehicle repairs. The
